NOTICE

Date:

THIS PERMIT BECOMES NULL AND VOID IF WORK OR CONSTRUCTION AUTHORIZED IS NOT COMMENCED WITHIN 180 DAYS, OR IF CONSTRUCTION OR WORK IS SUSPENDED OR ABANDONED FOR A PERIOD OF 180 DAYS AT ANY TIME AFTER WORK IS COMMENCED.

This permit is granted on the express condition that the said construction will, in all respects, conform to the Ordinances of this jurisdiction, including the Zoning Ordinance, regulating the construction and use of buildings, and may be revoked at any time upon violation of any provision of said Ordinances. It is further certified that the contractor is registered with the Builder's Board and is in full force and

effect as required by ORS 701.055, that if exempt, the basis for exemption is noted hereon, and that only subcontractors and employees who are in compliance with ORS 701.055 will be used on this project. The granting of a permit does not presume to give authority to violate or cancel the provisions of

any other state or local law regulating construction or the performance of construction. I hereby certify that I have read and examined this application and know the same to be true and

correct. All provisions of laws and ordinances governing this work will be complied with whether specified herein or not. By signing this, I agree to expressly and unequivocally call for and consent to any and all inspections deemed necessary by the Building Official and the Subsurface Sewage Sanitarian. The applicant for a grading/fill permit agrees to implement the required measures (See back of page) for grading permits as a condition of this permit.

		additional 10,000 cubic yards or fraction thereof.
100,001 cubic yards or more	943.81	for the first 100,000 cubic yards plus \$37.49 for each
		additional 10,000 cubic yards or fraction thereof.

## **REQUIRED MEASURES FOR GRADING PERMITS**

- A gravel construction entrance (ECM Section 3.3.1) shall be installed prior to the beginning of grading. The "ECM" or "Erosion Control Manual" can be located in the Stormwater and Erosion Control Ordinance, located on the Columbia County web site. Once you are in the Columbia County web site go to LDS Home, Building then Stormwater and Erosion Control Ordinance.
- □ Where slopes exceed 5%, a sediment fence (ECM Section 3.3.2) shall be installed at the base of the disturbed area or dirt stockpiles.
- As an alternative to a sediment fence, vegetated and undisturbed buffers at the base of the slope on the subject property can be utilized. Slopes above the buffer cannot exceed 10% and the buffer width must be at least equal to the uphill-disturbed area draining to it.
- During wet weather, October 1 April 30, a 6-mil plastic sheet cover (ECM-Section 3.3.9) or a minimum 2" of straw mulch cover shall be required on stockpiles where sediment is eroding and leaving the subject property or entering a water resource.
- Ground cover shall be reestablished prior to removing the erosion control measures described above (ECM-Section 3.3.6).

The applicant for a grading/fill permit agrees to implement the above required measures for grading permits as a condition of this permit.
